PROFESSIONAL SUMMARY

Software Engineer with 5+ years of experience building cross-platform mobile applications, backend services, and cloud-based solutions. Specializes in Flutter and Dart, with hands-on experience integrating AI/ML recommendation and real-time detection capabilities through Python APIs. Experienced in application architecture, state management, Firebase, REST APIs, and end-to-end software delivery.

PROFESSIONAL EXPERIENCE

SSGIT | Software Engineer | Dubai, UAE | 2025–Present

- Design, develop, and maintain scalable Flutter mobile applications alongside the backend services that support their core functionality and integrations.
- Integrated an AI-powered recommendation system into the mobile application, connecting production app workflows to ML models served through Python Flask/FastAPI APIs.
- Implemented ML-based detection functionality to support security use cases and real-time decision-making within the application.
- Apply Provider and Bloc state-management patterns to organize application logic, improve maintainability, and support responsive performance; use Claude, Cursor, and GitHub Copilot for coding, refactoring, and testing.

Stoork | Software Engineer | Remote | 2023–2025

- Delivered mobile application and backend functionality for e-commerce products, supporting ongoing feature development across the application stack.
- Integrated external payment services, push notifications, and analytics capabilities to support commerce flows, user engagement, and product insights.
- Collaborated within Agile development cycles, contributing to sprint planning, implementation, and backlog prioritization to coordinate feature delivery.

ECMPP | Software Engineer | Egypt | 2020–2023

- Built cross-platform mobile and desktop applications using Flutter, participating throughout the software lifecycle from gathering requirements to deployment.
- Developed SQLite-based local storage to enable offline access and hybrid online/offline application workflows.
- Integrated Firebase Firestore for real-time data synchronization and user management, connecting application interfaces with cloud-backed data services.

TECHNICAL SKILLS

- **Mobile:** Flutter, Dart, Android, iOS, Cross-Platform Development, Provider, Riverpod, Bloc, GetX, Material Design, Responsive Design, Figma
- **AI & LLM:** ML Integration, LLM Integration, Prompt Engineering, Recommendation Systems, ML Model Serving (Flask/FastAPI), RAG, MCP (Model Context Protocol)
- **Backend & Cloud:** Python (Flask, FastAPI), Node.js, REST APIs, Firebase, AWS, Google Cloud
- **Databases:** SQLite, Hive, Room, Firestore, SharedPreferences
- **Engineering & Tools:** Git, GitHub, GitLab, CI/CD (GitHub Actions), Unit Testing, Widget Testing, Integration Testing, Agile, Claude, Cursor, GitHub Copilot

EDUCATION

Bachelor of Management and Marketing | Alexandria University | 2020
